Project Title: "Plugging Into the Future: An Exploration of Electricity Consumption Patterns Using Tableau

Project Design Phase-I - Solution Fit Template

Team ID: LTVIP2026TMIDS41306

Define CS, fit into

1. CUSTOMER SEGMENT(S) CS

- Utility companies
- Energy policymakers
- Residential, commercial, and industrial electricity consumers
- Data analysts and researchers

6. CUSTOMER CC

- Lack of real-time insights
- Complex and unstructured data
- Limited technical expertise
- Time-consuming manual analysis

5. AVAILABLE SOLUTIONS AS

- Manual reports and spreadsheets
- Static charts and PDFs
- Basic monitoring tools without interactivity

Explore AS,

Focus on J&P, tap into BE, understand

2. JOBS-TO-BE-DONE / PROBLEMS J&P

- Understand electricity usage trends
- Identify peak and off-peak consumption periods
- Compare consumption across regions and sectors
- Support data-driven energy planning decisions

9. PROBLEM ROOT CAUSE RC

- Electricity data is large, fragmented, and difficult to interpret
- Lack of interactive visualization tools
- Dependence on manual analysis methods

7. BEHAVIOUR BE

- Users manually review bills and reports
- Compare usage periodically
- Depend on experts for interpretation
- Limited proactive decision-making

Focus on J&P, tap into BE, understand

Identify strong TR &

3 . TRIGGERS TR

- Rising electricity bills
- Power shortages or peak load issues
- Government energy regulations
- Need for sustainable energy management

10. YOUR SOLUTION

An interactive Tableau-based analytics solution that visualizes electricity consumption patterns by time, region, and sector, enabling faster insights, better planning, and improved energy efficiency. SL

8. CHANNELS of BEHAVIOUR CH

8.1 Online:

- Tableau dashboards
- Web portals
- Cloud data platforms

8.2 Offline:

- Energy reports
- Meetings and presentations
- Policy documents

Extract online & offline CH of BE
